

2017 Oort Workshop

The 2017 Oort lecturer, Prof. Imke de Pater (UC Berkeley) organized the Oort workshop, entitled "JWST/ERS Proposal Workshop: The Jovian System". The workshop took place from 9 May 2017 through 11 May 2017 in the lecture rooms of the Oort/Huygens building.

It was attended by about 35 participants from all over the world. The workshop was by invitation only, and its main goal was to trigger the preparation of a comprehensive JWST/Early Release Science (ERS) proposal on the Jovian System -- the main research topic of our Oort lecturer.

As far as we can tell, the workshop has been quite successful and has been well received by all participants. The support from the Sterrewacht (organization, IT) was excellent.

More details can be found at the workshop website at:
