

# Event Summary – NOVA Sponsorship

*Tomorrow's Astronomy: The Future of the Industry*

*Sirius-A's Annual Symposium*

The Event was hosted at the DOT Live Planetarium on Tuesday the 13<sup>th</sup> May. The event ran from 10:00 to 16:00 and attracted 77 attendees – primarily students of the association. There was a total of 5 talks, 45 minutes each, presented by:

Gert de Lange – Senior Engineer at SRON

Wim van Capellen – Head of Strategic Programs at ASTRON

Giuliana Rotola – Expert of Space Law

Ramon Navarro – Head of Optical and Infrared at NOVA

Max Collin – Managing Director of COSINE

The event Included lunch, as seen in the attached program, for all participants.

After the event there was a dinner, open to the organizing committee, the guest speakers and our contact person at the planetarium, as a sign of gratitude.

As a whole the event was very successful, it provided a unique opportunity for students to hear about ongoing astronomical projects and developments. Furthermore, spaces such as Lunch and the Bar allowed students to directly interact with the guest speakers.
